

FOR IMMEDIATE RELEASE

UKRAINE BORDER WILL BE PROTECTED WITH US MADE SURVEILLANCE SYSTEMS**KIEV UKRAINE | WASHINGTON DC | LOS ANGELES (Sep 15, 2015)**

Government of Ukraine and Aeroscraft Corporation (Aeros) announced the Ukraine-Russian border will be protected by Aeros made Elevated Early Warning Systems (EEWS), to provide the Border protection agency of Ukraine with wide area situational awareness.

Aeros, based in California, produces a unique border surveillance integrated EEWS with expanded capabilities for persistent air and surface surveillance and target tracking/identification, while addressing mission duration and cost efficiency.

The announcement in Kiev was attended by Aeros' CEO, Igor Pasternak and senior Ukrainian government officials; including, First Deputy Chairman of the State Border Service of Ukraine, General **Vasiliy Servatyuk**. *"To date, we have an ambitious goal of the "2 + 6". That is 2 stations will be established until the end of the year in order to provide surface and air surveillance. Consequently adding 6 more next year,"* said General Servatyuk.

"We and our industry partners are pleased to provide our unique integrated solution to help provide security for the people of Ukraine and increase the situational awareness for the State Border Service," Igor Pasternak said.

A division of Aeros, NADATS is a leader in providing a resource for integrated and cost-effective defense/ security systems for persistent surveillance missions, built upon Aeros' portfolio of aerostats, airships and elevated ground-based platforms. The division provides mission support for soldiers, agents and commercial operators, leveraging Aeros' unique expertise with elevated surveillance. NADATS' airships, aerostats, and elevated ground-based platforms have been engineered to help make vigilant or persistent surveillance missions affordable. NADATS integrates custom, mission-specific payloads for empowering awareness and action in hostile environments, in border and coast guard, in facility and event security, and for related missions.

About North American Defense Advanced Technology Solutions (NADATS): a mission-focused division of Aeros, the world's most innovative FAA-certified lighter-than-air (LTA) aircraft manufacturer, NADATS delivers integrated solutions for persistent elevated situational awareness in a global environment of growing need. NADATS custom design capability and portfolio of advanced airships, tethered aerostats and ground based early warning systems provide military and para-military operators with cost-effective solutions to detect, interpret and respond in surveillance, security, and asset protection scenarios. NADATS is driven to deliver efficient day/night monitoring, imaging capability, and communications solutions for operators in hostile environments, border/port security, law enforcement/ public safety, event security and safety, and facility and infrastructure monitoring, among others. **Learn more at www.NADATS.com.**

About Aeros: Founded more than 28 years ago, the Aeroscraft Corporation (Aeros) has achieved multiple FAA airship type certificates and operates with an FAA Production Certificate, while featuring a product line that includes advanced airships, tethered aerostats and the Aeroscraft cargo airship.
