**AEROS INVESTIGATING OPPORTUNITIES IN UKRAINE
FOR EXTENDING EXISTING OPERATIONS AND INVESTMENTS**

LOS ANGELES | WASHINGTON DC | KIEV (Oct 11, 2015) – Aeros, the first United State aerospace and defense company who is operating already in Ukraine, is in the process of identifying areas to extend operations and investment in Ukraine, and is also exploring numerous opportunities related to the Aeroscraft cargo airship, the world’s largest aircraft in production.

Following the announcement of the deal with the State Border Service of Ukraine and UkoBoronProm, first revealed in Kiev in September, the Ukrainian Government and Aeros are discussing the further programs based on American technology and best practice to invest in Ukraine, including forward-looking strategic opportunities for Ukrainian economic development and job creation.

“I see and understand great opportunity in Ukraine, which is why we are investing in Ukrainian security industries operations, and now desire for greater cooperation within the aerospace industry that can be mutually supportive in the years ahead,” explained **Igor Pasternak**, CEO of Aeros.

The partnership with Ukraine, Aeros, and UkoBoronProm first announced in Kiev will address Ukraine-Russian border protection by a series of Aeros’ Elevated Early Warning Systems (EEWS) situated at multiple stations. Aeros subsidiary Ukrainian company will work with its Ukrainian partners in the coming months to establish the first two stations this year, which will be followed with six addition stations being established in 2016 to provide actionable intelligence.

President of Ukraine Petro Poroshenko and Igor Pasternak , CEO Aeros meeting in New York on September 28, 2015

The Aeroscraft global reach cargo air vehicle

About North American Defense Advanced Technology Solutions (NADATS): a mission-focused division of Aeros, the world’s most innovative FAA-certified lighter-than-air (LTA) aircraft manufacturer, NADATS delivers integrated solutions for persistent elevated situational awareness in a global environment of growing need. NADATS custom design capability and portfolio of advanced airships, tethered aerostats and ground based early warning systems provide military and para-military operators with cost-effective solutions to detect, interpret and respond in surveillance, security, and asset protection scenarios. NADATS is driven to deliver efficient day/night monitoring, imaging capability, and communications solutions for operators in hostile environments, border/port security, law enforcement/ public safety, event security and safety, and facility and infrastructure monitoring, among others. **Learn more at www.NADATS.com.**

About Aeros: Founded more than 28 years ago, the Aeroscraft Corporation (Aeros) has achieved multiple FAA airship type certificates and operates with an FAA Production Certificate, while featuring a product line that includes advanced airships, tethered aerostats and the Aeroscraft cargo airship. **Learn more at www.aeroscraft.com**
