

FOR IMMEDIATE RELEASE

AEROS AERONAUTICAL SYSTEMS CORP. RECEIVES MULTIPLE AWARD SCHEDULE (MAS) 066 CONTRACT FROM THE GENERAL SERVICES ADMINISTRATION AGENCY (GSA)

LOS ANGELES/ FORT WORTH, TX (June 16, 2017) Aeros Aeronautical Systems Corp. (Aeros) announced today its GSA Federal Supply Schedule contract award. With this award, U.S. Government customers, now have the ability to contract directly with Aeros to purchase Airships and Aerostats. U.S. Government customers can now achieve and maintain effective aerial intelligence and security, whether air, land or sea-based, with Airships and Aerostats, that are manufactured to their particular budgetary and mission-specific requirements. Aeros advanced tethered aerostats, non-rigid airships, and elevated ground-based platforms, have been engineered to be the most cost effective, persistent and vigilant surveillance products available.

Airships provide great visibility and mobility, vigilant time on station, and can fly lower and/or slower to support observation and inspection operations. They facilitate day and night inspection and monitoring, and have reduced fuel and maintenance costs per flight hour when compared with capable alternatives

GSA Schedule award adds the following Aeros products to the schedule catalog:

'Sky Dragon Airship'

A mobile aerial sensor platform that provides mission endurance and integrates the latest technology to deliver situational awareness and actionable information to operators. The Sky Dragon serves varied missions including Intelligence, Surveillance, and Reconnaissance (ISR), border and security applications, maritime patrol, and search and rescue, among others.

Aeros' Aerostats

Aerostats are mobile, cost effective, and are deployed as tactical airborne platforms with surveillance cameras, radars, telecommunications equipment, and a variety of other scientific apparatuses. Aerostats can provide a constant 'eye in the sky,' delivering persistent, wide-area coverage that lends situational awareness to other air and ground support personnel.

About Aeros: Founded more than 30 years ago, the Aeroscraft Corporation (Aeros) is the world's most innovative lighter-than-air, FAA-certified aircraft manufacturing company. Aeros has achieved multiple FAA airship type certificates and operates with an FAA Production Certificate, while featuring a product line that includes advanced airships, tethered aerostats and the Aeroscraft cargo airship.
